FallingChalenge1 : How to Play

Balls fall from the top of the screen. Kick the good ones, avoid the bombs, and survive as many waves as you can.

Controls

Key	Action
`A` / `D`	Move left / right
`Space` (hold)	Jump. Hold longer to jump higher, up to a maximum height
`Left Shift`	Dash (only while standing on the ground)
`Enter`	Kick the nearest ball in range

Goal

Score as many points as you can before you run out of lives. You start with **3 lives**.

The balls

Ball	Point	Speed	What to know
Normal	1	Gets faster every wave	The most common ball
Slow	1	Always the same	Can only be kicked while you are **in the air**
Bomb	0	Random every time	Explodes if it touches you or if you kick it

Losing lives

- A **normal** or **slow** ball that reaches the bottom costs **1 life**.
- A **bomb** that explodes (touching you or being kicked) costs **1 life**.
- A bomb that reaches the bottom costs nothing, so the safest move is to let it fall.
- At 0 lives the game is over.

Waves

- **Wave 1** has 5 normal balls.
- Every wave adds **2 more normal balls**, and normal balls get **0.1 faster**.
- Every **2 waves**, one more **bomb** joins (wave 2: 1 bomb, wave 4: 2 bombs, ...).
- Every **3 waves**, one more **slow ball** joins (wave 3: 1, wave 6: 2, ...).
- A wave ends when all its balls are gone. After a short break, the next wave starts.

The target

- On every **5th wave** (5, 10, 15, ...) a **target** appears on the left or right side of the screen and moves up and down.
- Hit it with a kicked ball for **+10 bonus points**.
- It stays until the wave ends, so you can hit it more than once.
- Face its side and kick when a ball lines up with it.

Game over

When you lose your last life, the game over screen shows your final score and the wave you reached. From there you can play again or go back to the main menu.

Game Play Ideas

For the basic i just took the basket game and just copied it from the falling stuff and collecting the balls but it was boring so i said kicking the ball left and right would be better , so i made it that to collect the ball (kicking it) u need to be close to it first and click enter by making the collider trigger of the balls little bit bigger and a big range for kicking that if the ball collider is inside the range the ball would be kicked ,but I found out it would be super hard or close to impossible to get high score so i added dash the give the player boosted to the direction he facing but that didnt change anything so i added jumping depend on how long the player is holding the space bar and it worked , but it felt it needed more so i added for every wave a target come and the player choose ether play it safe and just get the 1 point or just shoot and pray u dont fall the ball to the ground , how it works is it spawn every 5 rounds and when it come it go up and down weather rightside or left and when the ball is shot and the 2 triggers colide it count as 10 point extra
